In Poland (2008-2010)

The photos that I took, are supposed to present the image of the biggest country in east - central Europe Poland. Those photos tell about my country, that is not pretty neither ugly. Not catholic, neither secular. They tell about country that is strongly influenced by history and tradition. In which, you can still see loads of leftovers from communism and strong influence of rich West.

The project was made thanks to scholarship from Ministry of Polish Culture and National Heritage in 2010 and scholarship Młoda Polska from Narodowe Centrum Kultury in 2011.
