

CLASSICS OF THE 20TH CENTURY POLISH PHOTOGRAPHY

In December 2010, the ProfiLab LFP Sp. z o.o. company introduced a series of reproductions of the *Classics of the 20th Century Polish Photography* series into circulation.

The twenty photos which constitute the series have been carefully selected from over twelve thousand images stored in the National Museum in Wrocław and the best private-owned collections.

Both technical- and aesthetic-wise, the works are masterpieces which form the history of Polish and international photography. Photograms are distributed as a strictly limited series – available only to the collectors who feel the desire to own the most beautiful and historically significant photos. The purpose of the collection is to get the photos out of museum safes where they normally lie, protected by prominent curators, and to introduce them into broad circulation (both for collectors and individual clients who desire to have contact with admirable cultural heritage).
