

ANGE LECCIA - NIGHT IN WHITE SATIN

A silent movie which focuses on a young girl's face. The image, filtered and animated by water in which the girl is submerged, constantly disappears and reappears. What we initially believe to be a moment of joy or rest, carries, in fact, a truly dramatic message: the face disappears under water and the girl drowns like Shakespeare's Ophelia. The amazing simplicity of the theme and the way it was developed combine into a genuinely poetic image.
